

Premier Internet Toolbar

“Turbo-charge Your Internet Experience”

The power and size of the Internet grow exponentially each day and Premier has created a toolbar that will significantly improve the Internet experience.

The **Premier Internet Toolbar** is designed to enhance and accelerate your Internet experience. With powerful and practical tools and without leaving the Internet, you can summarize text found on the Internet; can hear text read aloud; grab any webpage and convert it to a PDF file; and convert text to an MP3 file.

By boosting the capabilities of your browser, you can get so much more from your Internet experience !!!

Features & Benefits

-  ✓ **Talking Pointer**
-  ✓ **Talking Dictionary**
-  ✓ **Comprehensive Text Reader and Translation**
-  ✓ **Text Summarization utility**
-  ✓ **Web Grabber - capture any webpage directly to a PDF document.**
-  ✓ **Text-To-MP3 file creation utility**
-  ✓ **Zoom In and Zoom Out features - magnify the web page to your liking.**
-  ✓ **Quick access to Premier instructional training videos**

These tools enhance your ability to study, research, retain and recall information from the Internet more effectively than ever before !!!

Enhanced learning powered by Premier Tools

(The Premier Internet Toolbar is included with all installations of the Premier Literacy Suite and Literacy Productivity Pack for Windows. See reverse side for details.)

Premier Internet Toolbar

“Turbo-charge Your Internet Experience”

Premier Internet Toolbar –

Simply choose ANY application from the Premier Internet Toolbar to enhance your Internet experience.

Talking Pointer® The *Talking Pointer* is a useful tool for reading text on the Internet. When activated, the *Talking Pointer* will read aloud any text you point at on the Internet. It has a view window that can be turned on and off and that displays the word which is being spoken aloud. The *Talking Pointer* can also translate the text on-the-fly to several different languages – English, French, Spanish, Portuguese, Italian and German.

Talking Dictionary® The *Talking Dictionary*, which comes complete with a built-in thesaurus and word interlinking, makes finding a word easy. Unlike other dictionaries that take you to a separate website, the Premier *Talking Dictionary* will display and read the definition aloud in a pop up window. Highlight the word in question, and click the *Dict.* button on the toolbar to hear and/or view the definition.

Text To MP3® The *Text To MP3* tool will let you create either MP3 or Wave files. An MP3 file is a smaller, more compact file. An MP3 file, compressed with 128 bit sampling rate, will be about a third of the size of a comparable Wave file.

Zoom® The *Zoom In* and the *Zoom Out* features let you reduce or enlarge the site with the click of a button.

Summarize IT® *Summarize IT* is a reading tool designed to help you efficiently wade through the extensive volumes of information on the Internet. The *Summarize IT* tool will summarize articles on -the-fly, saving you time by letting you quickly read a very accurate summary of an article.

Web Grabber® The *Web Grabber* is used to capture a web page. The *Web Grabber* allows you to grab and save an entire web page for later use. The web page is saved in a compact PDF file format. This single file format makes it easy to save and/or email. In addition, the *Web Grabber* has a built-in PDF editor which enables the merging of multiple files into a single file. It also allows pages to be deleted from a PDF file.

Reader® The *Reader* is useful for reading long articles. It is a selective reader which means you can select the text you want to read and click the *Reader* button on the toolbar to hear the text read aloud.

Premier Tools Training Videos Premier Literacy has also developed instructional training videos for the Internet Toolbar. Each video is designed to be 5 to 10 minutes in length. You can review the training at any time, day or night. It is like having your own personal software instructor.

System Requirements

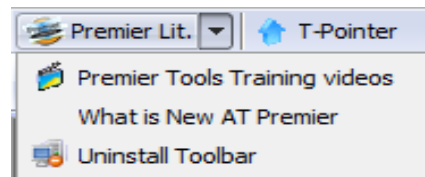

The *Premier Internet Toolbar* requires Internet Explorer version 6.0 or higher.

Operating System: Windows XP, Vista, Windows 7

CPU: 900MHz or faster Hard Drive Space: 20MB

Ram: 256MB or more – 512 MB or higher is recommended.
